Connect

And we're not talking online dating.

'We're proud to have designed, deployed and now manage one of Australia's largest SD-WAN networks in use today.'

Connecting you to your world.

Traditional Telcos can't meet all of your organisation's network requirements; their reach and technology mix will be limited. Disruptive technologies have a habit of reducing their revenues so they're slow to adopt them.

CommsChoice customers have access to a best-ofbreed, global, multi-provider portfolio that will securely connect them to their universe.

When you can't find a Telco to deliver all the access you need - we'll knit your network together using the most appropriate supplier mix and manage it end-toend for you too.

Our Connect portfolio delivers data networks, Internet and access technology to underpin your chosen network and collaboration tools with the sole purpose of delivering on your expected business outcomes.

Our vendor neutrality allows us to deliver carrier diversity when required.

DEMOCRATISING THE NETWORK WITH DISRUPTIVE SD-WAN.

Replace expensive carrier-controlled MPLS networks with a public internet-based solution eliminating unnecessary hardware and leveraging simple, ubiquitous, competitive internet connectivity for rapid deployment and considerable cost savings.

Other secure connectivity solutions:

MANAGED WIFI

Evolve your network and user experience with reliable, cost effective Wireless LAN access. Imagine the power of secure, lightning-fast, enterprise-grade WiFi that works as hard as you do.

NATIONAL AND INTERNATIONAL **NETWORK ACCESS**

We'll build a premium, high performance network that provides the speed and bandwidth crucial for modern, data hungry businesses wherever they operate.

Delivered using the most reliable access technologies

- and powered by the largest and most trusted Telcos
- our scalable service offers reliable speed at a price that won't break the bank.

NBN

The National Broadband Network or nbn will soon connect every business in Australia creating new business opportunities through high-speed connectivity, unified communications and cloud computing.

We're here to help protect your business continuity and prepare you for the transition to the nbn now.

PUBLIC CLOUD CONNECT

Private and dynamic network access to connect to Public Cloud platforms – bringing cloud and network together using the most trusted networks.

Connect with a vendor that cares about delivering on your business needs; connect with a product not limited by one network.

Collaborate

All talk and collaboration means more action.

'Multi-modal communications interactions are now the norm. Key drivers for this shift include low cost of ownership, growing trends towards mobility and integration of communicating services onto one single platform'.*

Being connected and productive doesn't demand being in the office. Our collaboration portfolio integrates mobility, video and voice conferencing, instant messaging, desktop sharing and more.

Replace your legacy telephone system with a unified communications cloud hosted solution, allowing your team to be more agile and responsive while fostering flexible ways of working.

It doesn't matter if your team is spread across the country, or across the world – if they can easily communicate and collaborate they're going to be happier and more productive.

scalability, and simplicity on one single, integrated platform across all your office locations.

Imagine the power (and cost savings) of being able to short dial colleagues in your Mumbai office from your desk in Sydney.

VOICE

INSTANT MESSAGING & PRESENCE

Unify your business communications. Leverage the

benefits of fixed telephony, mobility, collaboration,

Simple but effective

collaboration tools:

For many business users, especially millennials, having access to enterprise instant messaging (IM) across devices is as important as access to voice services or email.

Enable your team to communicate whether they are on the road, in the office or at home for little to no cost.

MOBILITY

CommsChoice mobility solution provides 4G access to Australia's most extensive mobile network connecting 98.8% of the population.

Enjoy the freedom of unlimited standard talk and text in Australia. Select ample mobile data allowances, great international call rates and cost-effective optional roaming packs for a complete solution.

HD VIDEO CONFERENCING

Face-to-face meetings no longer necessitate wasting time and money travelling.

Bring teams together and connect your people both locally and around the world with high definition, integrated video conferencing.

APPLICATION INTEGRATION

Integrate your business applications with API toolkits to add value that stretches across your value chain.

Manage your customer interactions; and capture data updates in real time so you always have a full record of what's occurring.

CALL CENTRE

Simplify and optimise your call centre, delivering enhanced customer service and greater efficiencies without paying for the functionality you don't need.

Our feature rich Call Centre feature set is flexible, efficient and has everything you need in the one place.

Manage

Let us do your dirty work.

'Demand to reduce IT and operations costs, while enhancing business productivity will see the global cloud managed services market reach an estimated AUD 114.8 billion by 2025'.*

Supercharge your infrastructure to become an enabler of business value and productivity.

Modern enterprise can no longer treat managed services as an ad-hoc solution to the challenges of increasingly complex network environments.

Have confidence in your technology strategy; save time and money streamlining your operations, gaining hours of productivity every day.

CommsChoice Managed Services provide a bridge between you and your technology environment, delivering unprecedented management of your evolving IT landscape.

Our suite of modules allow you to focus on more important things - like growing your business.

Game-changing managed services:

MANAGED SERVICES

Transform your infrastructure into an enabler of business value and productivity - without the pain of dealing with multiple vendors.

Work with a team of certified specialists passionate about technology and the success of your business. Don't wait unit it's too late.

CLOUD FIREWALL

Secure your cloud transformation

Get fast, secure, and direct access to your apps—without devices.

Secure local Internet breakout without backhauling and duplicating security appliance stacks at your dispersed locations. And because it's 100 percent in the cloud there's no hardware to buy, deploy, or manage.

ARCHITECT

Wondering how to compete in today's dynamic marketplace? Your people need the ability to communicate and collaborate in an instant.

Is your network strategy aligned to deliver on your business objectives? Will your technology investment continue to deliver value in years to come? Do you have the right kit to enhance user experience? These are just a few of the questions our Solutions Architects can help you answer.

DELIVER

Realise the benefits of having a team of dedicated, certified professionals manage every aspect of your onboarding and project management delivery.

Our team of onboarding managers co-ordinate the implementation, configuration and integration of your solution; leaving you to focus on your business.

* Grand View Research, Inc- Cloud Managed Services Market Size, Share & Trend Analysis. April 2018Global Forecast to 2021.

'SD-WAN is advancing towards mainstream adoption. It's currently estimated SD-WAN will comprise 25% of all WAN traffic by 20211.'

Managed SD-WAN

Democratising the network with disruptive SD-WAN.

Cut out your carrier, simplify branch networking and dramatically reduce costs.

Sounds too good to be true. But it's not.

CommsChoice is proud to have delivered Australia's largest SD-WAN solution to date – with more than 230 sites (November 2018). SD-WAN delivers incredible cost savings when compared to legacy MPLS networks, and faster deployment. It also provides practical security and Quality of Service for voice and video applications, even using the public Internet.

SD-WAN is becoming particularly relevant as your business adopts more cloud, mobility, voice and video applications. And with many organisations spread across multiple sites and often different countries, branch network has become increasingly complex and expensive to scale and secure. SD-WAN permits secure Internet breakout at the edges of your network, bonding and optimising lower bandwidth access links such as 4G, ADSL and NBN to deliver faster, reliable connectivity in dispersed locations.

All of our solutions can be wrapped up with a Management layer to help you supercharge your infrastructure into an enabler of business value and productivity. And drive reductions in total cost of ownership.

¹DC SD WAN Forecast

Why partner with us?

OUR SWEET SPOT IS SERVING YOUR MULTI-SITE, MULTI-COUNTRY BUSINESS.

Providing high quality, secure communication solutions to a diverse global workforce has never been easier. Our global, fully-featured network is hosted in 25 (and growing) locations around the world.

TOTAL COST OF OWNERSHIP ADVANTAGE.

Combine the benefits of hosted voice and collaboration with a turnkey managed network service – and you can comfortably reduce costs.

WE'RE CARRIER NEUTRAL.

We're not burdened by selling our own network like a traditional telco; we select the best providers for your solution. Carrier diverse connectivity delivers maximum uptime.

FUTURE-PROOF PRODUCT SUITE.

Everything you need from one global communications provider - networks, enterprise mobility, unified communications, applications - all wrapped up with 24/7 support.

ONE NUMBER – ONE BILL – ONE CONTRACT.

Focus on your core business and leave the boring stuff to us. We'll provide secure, reliable network connectivity to enable your business to grow. All on the one bill.

EASY TO DEAL WITH.

Quick to deploy, simple to use. As a disruptive technology provider, we focus on our customers adopting the solutions we deliver so they realise the maximum benefit.

Our sweet spot is your multi-site, multi-country business

One single, integrated platform.

Providing secure, flexible and fast communication solutions to a diverse global workforce has never been easier. Or more cost effective.

Transform your enterprise communications using a single, reliable provider operating global voice and data networks. Our global network is hosted in 25 (and growing) locations across every (populated) continent.

A unique, global reach

We continue to focus on the international delivery of infrastructure independent services leveraging 25 (and growing) Virtual Service Integration Points (VSIPs) located in 16 countries around the world, providing greater flexibility and true global collaboration. Our infrastructure independent strategy ensures a 'client-first' approach and allows us to tailor agile solutions that deliver on your business communications objectives.
